

Mechanical Engineer

Do you want to work on innovative, customer-specific products that truly make an impact in real-world applications? At Conectco, as a Mechanical Engineer you'll have the opportunity to create mechanical designs that directly contribute to intelligent electronic solutions, taking your concepts all the way through to production.

You'll be part of a close-knit, multidisciplinary team, tackling exciting projects in fields such as automotive, aerospace, and industrial automation. If you're seeking an informal working atmosphere, plenty of room for your own ideas, and hands-on projects where you can see tangible results, you'll quickly feel right at home here.

Tasks and responsibilities:

- Designing mechanical products and components in SolidWorks or a similar CAD package;
- Overseeing the production process of your designs in collaboration with our internal production department;
- Developing tools, test systems, and carriers to support production;
- Contributing ideas for innovative solutions to technical challenges;
- Collaborating with colleagues from various disciplines such as hardware and software development.

We are looking for someone with:

- A completed technical education in mechanical engineering or a related field;
- Good knowledge of SolidWorks or a comparable 3D drawing package;
- A proactive, solution-oriented attitude and the ability to work as part of a team.

What do we offer?

- €3,200 - €3,800, depending on your experience and profile;
- Challenging work within an informal and professional working atmosphere;
- Plenty of opportunities for personal and professional growth;
- Work on unique, innovative projects with tangible results.

About Conectco

Conectco is an innovative company specializing in the development and production of customer-specific hardware, software, and mechanical products. Our team of approximately 35 professionals combines years of experience with a fresh, forward-thinking approach. We serve various sectors, including automotive, aerospace, and industrial automation.
